

DON'T BE A VICTIM!

Find your weaknesses before the criminals do.

PEN Consultants

Information & Cybersecurity Testing Services

OUR PURPOSE

PEN Consultants was created to help our clients and our community become more secure and immune to cyber attacks by mimicking the actions of a hacker to locate and prioritize potential attack vectors.

OUR VISION

PEN Consultants strives to be the most highly skilled, ethical, effective, and biblically-centered security testing company in the industry, while remaining the most affordable.

OUR MISSION

PEN Consultants' mission is to provide our clients with the highest quality Information and Cybersecurity Testing Services and deliver an actionable plan to protect their systems and data.

OUR SERVICES

VULNERABILITY SCANNING & ASSESSMENTS

Our most simplistic testing service that utilizes one or more industry-standard vulnerability scanners to test for common vulnerabilities and identification of weaknesses with your network, web apps, and mobile apps.

PENETRATION TESTING

We attempt to circumvent security controls and exploit discovered vulnerabilities in your network, web apps, mobile apps, software, wireless, etc., and then provide actionable solutions to help you protect your organization from attack/compromise.

RED TEAMING

For mature clients looking to test not only their technical security stance, but also test humans and detection capabilities through stealthy recon and penetration of your defense (Adversary Simulation) or work directly with the blue team/SOC (Technique Simulation).
